SANDNES, 25.10.2015

REFERENCE

In 20013 Mariusz Polit had the responsibility for the refurbishment of a considerable amount of work in my new bought house. The house consisted of a building with including 3 floors. I wanted to refurbish 3 bathrooms, one in each floor as well as the entrance and a sleeping room.

The bathroom in the basement had to be completely renovated including building new walls with insulation and ventilation. Tiles were laid on the floor and walls with use of small decoration tiles and very nice listing.

The bathroom in the ground floor was nicely refurbished with tiles, 60x60 cm tiles on the floor.

The bathroom at the top floor was made of two previous rooms, in total 25 m2. All insulation in the roof was reinstalled with proper ventilation at different levels. All walls were prepared for tiles including lightning installed in the tiles. The use of matching colored tiles on the floor, in the shower and on the walls made it all look like pictures in a design magazine. It is looking perfect!

I'm very satisfied with all work performed by Mariusz and his assistant.
